

bdlp and Phoenix - Our partnership

Thanks to the collaboration between Phoenix and bdlp, communication throughout Europe is now faster and easier.

Mr. D.W. Frank, president of bdlp advanced technologies SASU, is the first point of contact for customers across Europe as the main representative of Phoenix.

Image: Mr. D.W. Frank - bdlp consulting.

With over 25 years of experience and knowledge as a specialist in photonics with an extensive international network, bdlp is an obvious contact for anyone searching for technical support, glass manufacturers and materials.

Blanks are offered as Grey glass, glass blanks, cut discs, raw materials, block or rod material, flat glass, pressings and pressed aspheres.

Each piece of glass provided by Phoenix has it's own individual barcode, which includes the glass manufacturer, glass type, melt number, length, width, thickness and Nd and Vd. This barcode is issued when the order is placed, this ensures complete traceability.
